

I am writing as an overly satisfied subscriber to XM Satellite's service. I believe that they provide a service which exceeds my expectations. Please reject NAB's petition 04-160 since I understand that it would limit XM's ability to provide me with the local traffic & weather updates which are critical to my ability to successfully travel in the Washington, DC area. Their 24 hour service is exceptional and has helped me to navigate an extremely congested part of the country, enabling me to keep both business and personal commitments.
